

Unique

Individual

Bespoke

We are pleased to present our Stocked Range of Melamine Faced MDF Boards.

The boards shown are specially produced for us at our facility in Northern Spain. Here these products are made in their entirety, from the MDF core to the Decorative Finish; everything is made in one factory allowing fast production and turnaround. To facilitate simplified handling and logistics we have selected 2440 x 1220 board sizes for both backings and fascias.

Melamine Technology has advanced dramatically in the last few years, allowing far harder wearing surfaces combined with premium finishes and luxurious textures that give a feel of quality whether it be our plain colour range, our Inspired Range such as Linen, Leather or even a contemporary Industrial Concrete there are a multiple of options to suit all tastes. Additionally, many of our premium woodgrain options emulate not only the look but also the feel of their real wood counterparts giving the added advantage of once again being able to choose a species that may be costly as a real wood or even one which may be protected and can no longer be harvested.

Our Melamine range is chosen by us to complement our existing range of Decorative Boards, such as our comprehensive offering of Birch Plywood and real wood Veneered Boards – everything is kept in stock.

All our melamine boards are 100% PEFC Certified allowing you to be sure that you are selecting a product that is promoting sustainable forest management at the same time.
